The McClellan Law Firm

***Product and Government Liability,
Business Dispute Experts***

Backgrounder

The McClellan Law Firm has earned a national reputation for successful litigation of cases involving product and governmental liability, worker safety and business disputes. The firm has obtained over 70 verdicts and settlements of \$1 million or more on behalf of clients throughout the country. Its cases have been featured on *60 Minutes*, the *MacNeil-Lehrer Report* and other national media.

Craig R. McClellan, president, is a frequent speaker and contributor to national legal publications on topics related to complex civil litigation. He is a fellow of the American College of Trial Lawyers and has been voted by his peers as one of the “Best Lawyers in America.” McClellan is a member of The Inner Circle of Advocates, a prestigious national organization of the 100 best plaintiff lawyers in the United States.

Nationally Recognized in Product Liability

The McClellan Law Firm has represented the victims of virtually every type of defective and dangerous product, including dangerous and defective automobiles and their component parts and dangerous and defective industrial, work-related and home products.

In automotive litigation, The McClellan Law Firm has successfully represented clients against most manufacturers, including Ford, Mercedes Benz, General Motors, Chrysler, Isuzu, Nissan, Hyundai, Toyota, Honda, BMW and Porsche. Through its exhaustive approach, the firm's lawyers have identified defective and incomplete designs on safety features, restraint systems, seats, gas tanks, stability systems, transmissions, door latches and tires. Their work helped lead to a new California law for warning consumers about potential dangers from lap-only seatbelts. The Department of Justice, based on the firm's successful lawsuit against Honda, credited the firm with being instrumental in getting three-wheeled all-terrain vehicles banned from sale in the U.S. because of their inherent dangers. The firm has also won sizable settlements for victims of catastrophic injuries and death due to poorly designed or defective after-market lift kits, tractors, trucks, electrical panels and industrial machines.

Government Liability Success

The McClellan Law Firm has obtained results on behalf of its clients in a wide array of governmental liability cases, including injuries, paralysis and death caused by badly designed roads, lack of guardrails, poorly maintained median strips that became ramps for cars into opposing lanes rather than barriers, and dangerously designed intersections.

Business Dispute Expertise

The firm also enjoys a successful track record in business disputes, representing corporate and individual executives, entrepreneurs, investors and owners in contract, tort, intellectual property and other statutory-based causes of action.

Other work for clients in business disputes included settlements involving breach of contracts on energy agreements, legal malpractice, insurance bad faith and property and title disputes. For more information on these cases and others involving multi-million dollar awards and settlements, see the firm's Web site at www.mcclellanlaw.com.
